## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-3 and 6-7, drawn to an apparatus, classified in class 378, subclass 181.
- II. Claims 8-12, drawn to a system, classified in class 378, subclass 588.

Claims 4-5 and 13-16 will be examined along with invention II, if elected.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the patentability of the combination (see evidence claim 8) does not rely on the details of the subcombination (see claims 2-3 and 7). The subcombination has separate utility by itself or in other combination including an optical scanner having movable light source.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and the fields of search are not coextensive, restriction for examination purposes as indicated is proper.

Art Unit: 2872

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
